

Symposium on the Practical Applications of
Mass Spectrometry
in the Biotechnology Industry

KNOWLEDGE SHARING AND CAPACITY BUILDING

- Reminder that there are still unknown *unknowns that have yet to be characterized* within the development space of protein therapeutics.
- Mass spectrometry and specifically, CD-MS, has great utility and is a *powerful tool for the analysis* of large protein complexes, capsids and AAV.
- Learn about the *dark proteome* which allows one to look at 'uncharacterized protein' with a new appreciation.

MASS SPEC 2022 BY THE NUMBERS

Attendee Participants

In-Person - **179**

Virtual - **44**

First Time - **75**

Poster Presentations

59

Company Participation

78

Country Participation

12

Australia | Canada | Denmark | Germany | Hungary | Ireland | Japan |
South Korea | Sweden | Switzerland | United Kingdom | United States
