

## KNOWLEDGE SHARING AND CAPACITY BUILDING

- Bioassays are *critical to all stages* of product development; listen to them!
- Bioassay scientists & statisticians can *achieve powerful outcomes when working together* to analyze and transform complex data into meaningful potency results.
- Developing MOA-relevant, QC-friendly bioassays for emerging biologic and vaccine modalities *requires new analytical tools and critical thinking* about how we describe product potency.
- Emerging from the COVID-19 pandemic, industry and regulatory authorities are poised to *bring medicines to patients faster than ever before!*

## BIOASSAYS 2023 BY THE NUMBERS

**First-Time Attendees**

**78**

**Speaker/Panelist Participation**

**20**

**Company Representation**

**54**

**Country Collaboration**

**10**

Canada | Denmark | Germany | Hungary | Israel | Japan | Sweden | Switzerland | United Kingdom | United States
