

CGTP SUMMIT 2023

KNOWLEDGE SHARING AND CAPACITY BUILDING

- This *new one-day program* was dedicated to deep-dive discussions on the topic of comparability. Topics will change every year.
- Viral vector-based gene therapies, the analytical toolkit, and process & product understanding *continue to mature* – and analytical comparability exercises *can be sufficient in many cases*.
- Challenges for assessing the comparability of CGTP include *complex products and a limited body of knowledge to date* in terms of clinical and manufacturing experience.
- Cellular products need a tailored approach whether autologous or allogeneic. Paired starting material approach is *useful but needs further consideration* to account for the inherent variability of cellular starting material.

CGTP Summit 2023 BY THE NUMBERS

**Attendee
Participants**
In-Person - **120**
Virtual - **200**
First Time - **123**

**Regulators
Participation**
14

**Company
Participation**
80

Country Participation
17

Afghanistan | Australia | Belgium | Canada | China | Denmark |
France | Germany | Ireland | Italy | Netherlands | Portugal | Singapore |
South Korea | Switzerland | United Kingdom | United States
